Add-A-Roll Kit! You may also order the Add-A-Roll kit which includes 1 Paper Bar Spring, 2 Paper Bar Washers and 2 Collars with Wing Nut. This kit allows you to run 2 paper rolls simultaneously. **Order part number 78008.**

STEP 1. **Assemble the main frame tubing** using 1/4"-20 X 2" bolts and 1/4" washers. **Note the locations of all punched holes** in all tubing to ensure proper assembly. Assemble and install the Tape Spools. Follow the diagram below closely to ensure proper assembly of the Tape Spools. The order of the hardware is identical for both sides.

STEP 2. **Assemble the rear Paper Bar** following the diagram below. Attach Paper Bar to the main frame with the attached knobs. Next, install Cutter Bar as illustrated below. Ensure that Cutter Bar teeth are facing forward and down as shown. Install Paper Bar Spring on the **BACK SIDE** of the Cutter Bar. Lastly, install the 4 Tubing Caps to the bottom of tubing to aid in traction and stability.

Paper roll and tape spool placement. Two Tape Spools are included so that you may conveniently run your tape along either end of your paper roll by simply adjusting the location of the paper roll along the Paper Bar.

Apply pressure to Paper Bar Collar, Spring and Washer against paper roll and tighten wing nut to secure at desired tension.

Align paper roll so that half of the tape is on the paper and the other half hangs over.

Paper is routed BEHIND the forward paper bar and held securely by the Paper Bar Spring BEHIND the cutter bar.
